Introduction

Introduction

Electronic Health Records (EHR) in Castilla-La Mancha Health Service (SESCAM)

Hospital

Primary care

Objetivo

To integrate the registration of RNAO BPG recommendations in a standardized way into the EHR of the SESCAM

Material and methods

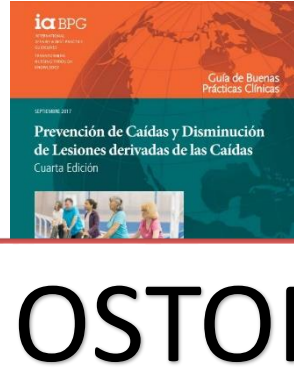

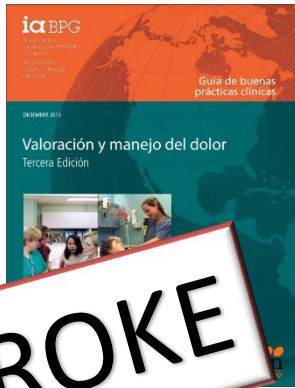

Main pions

Modifications to EHRs
Coordinated by the BPSO-Host Regional

Outcomes and results

(until November 2024)

R
N
A
O

STROKE

OSTOMIES

BREAST FEED

Forms and standardized care interventions modified

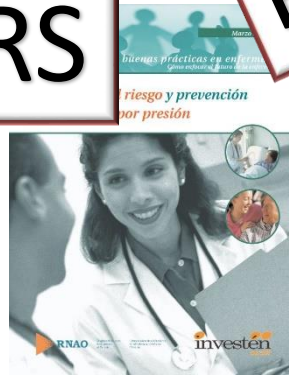

23 at hospitals

12 in primary care

FALLS

PRESSURE ULCERS

PAIN

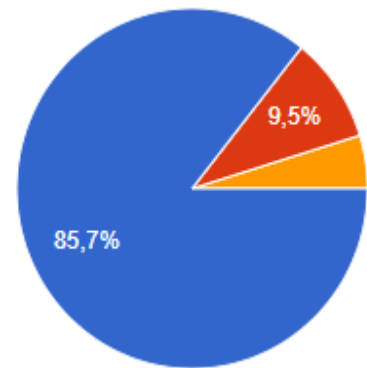

Outcomes and results

Health practitioners satisfaction in modifications

85.7%

- Sí
- No
- Por ahora no puedo opinar

Conclusions and benefits

LEADING CHANGE!

- ❖ The restructuring of the EHR on the application of RNAO BPGs contributes to avoiding unwanted variability in patient care and promotes equal care for patients in any SESCAM healthcare centers
- ❖ The experience demonstrates the feasibility and effectiveness of standardizing nursing records based on RNAO BPGs to promote equality of care
- ❖ Outcomes suggest that standardized nursing records can contribute to reduced healthcare disparities

Thanks!
